

## **How to perform the update to Version 2.01 :**

That's quite easy! Just follow the instructions below.

### **To new customers :**

- please note that you will purchase The Trumpet, Version 1.01
- you need to install this version first, then go through the updating procedure as described below.

### **To perform the update:**

- start the NI Service Center (a utility provided with the Trumpet Installer).
- go to "Update" page -> "Sound Downloads" -> "Show Details", and check "The Trumpet 2.01 Update".
- go to "Manual and Tutorial Downloads" -> "Show Details", and check "The Trumpet 2.01 Documentation".
- click on the "Download" button.

- alternatively, you can download the updater from the Native Instrument homepage using the Personal Update Manager:

[www.native-instruments.com](http://www.native-instruments.com) -> SUPPORT -> UPDATES (login necessary)

- run the updater application on your system; don't forget to enter the right destination (library location) if you are prompted to do so.

**In case of difficulties please contact the technical support at:**
